TECHNOLOGICAL TECHINICAL PRODUCT:

ASSERTIVE FAMILY INTERVIEW:
PROFESSIONAL TRAINING FOR
ORGAN AND TISSUE
PROCUREMENT

Ailton da Silva Carvalho
Ivanete da Rosa Silva de Oliveira

2022

Presentation

This website was developed as a Technological Technical Product integrating the Master's Research carried out in the scope of the Professional Master's Program in Health and Environmental Sciences Teaching - UniFOA. The construction took place between June 2020 and June 2022 and was supervised by Professor Doctor Ivanete da Rosa Silva de Oliveira. The goal is to present assertive Family Interview as a possible strategy for professionals involved in organ and tissue procurement for transplants, as well as a continuous professional training space for health professionals.

Visit the website

1 - What is the Assertive Family Interview?

In this item we build all the reference for the planning, elaboration, and execution of the technique as a way to welcome and succeed in the procedure, providing a legitimate space for health care.

2 - Steps for an Assertive Family Interview

Here information and guidance are offered on the essential steps for developing the Methodology in an objective manner.

3 - Documental process

Document models were made available (PDF files) that comprise the entire development of the organ and tissue procurement process for transplants, with the purpose of speeding up professional conducts.

4 - Permanent Dialogue

This item was thought and planned for the sharing and exchange of experiences, feelings and suggestions, from the use of the website.
