PRESENTATION

FISCALIZ@EDU

The Fiscaliz@edu software was developed as a Technical Technological Product that is part of the Master's Research carried out within the scope of the Professional Master's Program in Teaching Health and Environmental Sciences - UniFOA. Construction took place between August 2022 and February 2024, under the guidance of Professor Lucrecia Helena Loureiro. The software aims to train inspector nurses from regional nursing councils in inspections of healthcare establishments.

PRODUCT FEATURES

ELECTRONIC NOTIFICATION INSTRUMENT

The software's function is to electronically complete the instrument for notifying illegalities/irregularities identified by the supervisory nurse in health institutions, allowing training in the meaningful learning method.

BANK OF LEGISLATION AND REGULATIONS

With a database with the main relevant legislation and current Cofen resolutions, it brings more practicality and agility to consultations during inspections.

SEARCH FOR NURSING PROFESSIONALS

Enables the search for nursing professionals in integrated systems to verify legality during the exercise of the profession.

CHECK-LISTS

It has checklists that guide the inspection process by niche, providing greater security in inspection activities.

INSPECTION REPORTS

The system allows the transposition of information related to inspection, facilitating the process of preparing reports by the supervisor nurse.

INDICATORS

Allows the generation of indicator reports, facilitating control of the numbers achieved and interventions in problems.

AGILITY AND STANDARDIZATION

The agility in sending information to an information system brings more security and effectiveness to the process, in addition to standardizing actions across all regions.
